

SNS-Managed Security Services

Providing Industry-Leading Managed Security and Security Information and Event Management (SIEM) Solution Options

Powered by SecureWorks

Managing Security

Are you efficiently staying on top of regulations and controls related to your IT security? Can you prove to regulators that your infrastructure is continually protected against attacks? If you answered no to these questions, Metavante can help.

Through our partner, SecureWorks, Metavante is pleased to offer a variety of managed security solutions.

Who is SecureWorks?

SecureWorks provides financial institutions with unparalleled industry expertise in comprehensive, 24/7 managed security services combined with a world-class SIEM portal, ensuring they remain in compliance with security regulations. SecureWorks has been identified by Gartner as a leader in the MSSP Magic Quadrant.

Services Include

Full management, monitoring, or self-help for the following security infrastructure:

- Network Intrusion Prevention Service
- Firewall
- Vulnerability Assessment Service
- Host Intrusion Prevention (HIPS)
- Anti-Spam/Anti-Virus Service
- Encrypted E-Mail Service
- Network Infrastructure

Really, How Important Is Security?

Did you know security can impact your profit? SecureWorks can actually save your bank money. By having SecureWorks manage your security around the clock, you can eliminate the need for highly trained security experts to monitor your systems. In addition, because SecureWorks compiles compliance reports for your board of directors and bank's executives, your IT staff no longer needs to spend their time generating reports whenever an audit or exam is scheduled – simply leverage the SecureWorks reports via your SIEM portal.

Protect Your Assets

Securing a financial infrastructure is accomplished by ensuring there is protection at multiple layers. Because banks are required by federal regulators to fully protect their IT Infrastructure both internally and externally, it's critical that your infrastructure be adequately protected. Are you prepared if your IT assets would be compromised due to a threat or vulnerability to your system?

SecureWorks will provide consulting and solution options that can meet your organization's IT security goals and mitigate risk within your IT infrastructure.

Contact Us

Let Metavante and SecureWorks help you demonstrate that your institution has a risk-based approach to protecting your IT assets. To learn more, please contact your Metavante relationship manager, call 800-822-6758, or visit metavante.com.
